

Selfinitions

Iasafro Maesman

Definition. A *selfinition* of a word is a calligram using only the letters in the word that “defines” graphically the word itself. Letters can be repeated, but they should retain their shape, although variations of size and color are allowed.

This documents contains the original 30 selfinitions that were sent to 30 different people from Leipzig (Germany) on the 17th of August of 2018. They were sent as postcards where the above definition and a selfinition were written.
